SatiQ
Concrete
Manufacturer

SANTARITA STUDIO

Satiq Concrete Manufacturer brings to you a range of innovative concrete products has been developed, showcasing versatility and diverse applications. These products leverage advanced material formulations combined with precise manufacturing processes, resulting in unique offerings that cater to various industry needs.

Some notable examples include:

- Ultra-high performance concrete (UHPC) capable of achieving extremely thin sections with compressive strengths of up to 40 MPa
- Durable, non-breakable concrete solutions
- Lightweight concrete options for panel applications
- Cement-free concrete alternatives

The standardization of micro-factories enables the widespread adoption of these products across India, providing a scalable and efficient solution for various industries

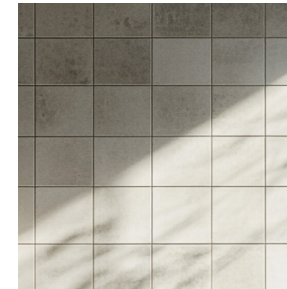

CONTENTS

UHPC

LIGHTWEIGHT

NON BREAKABLE

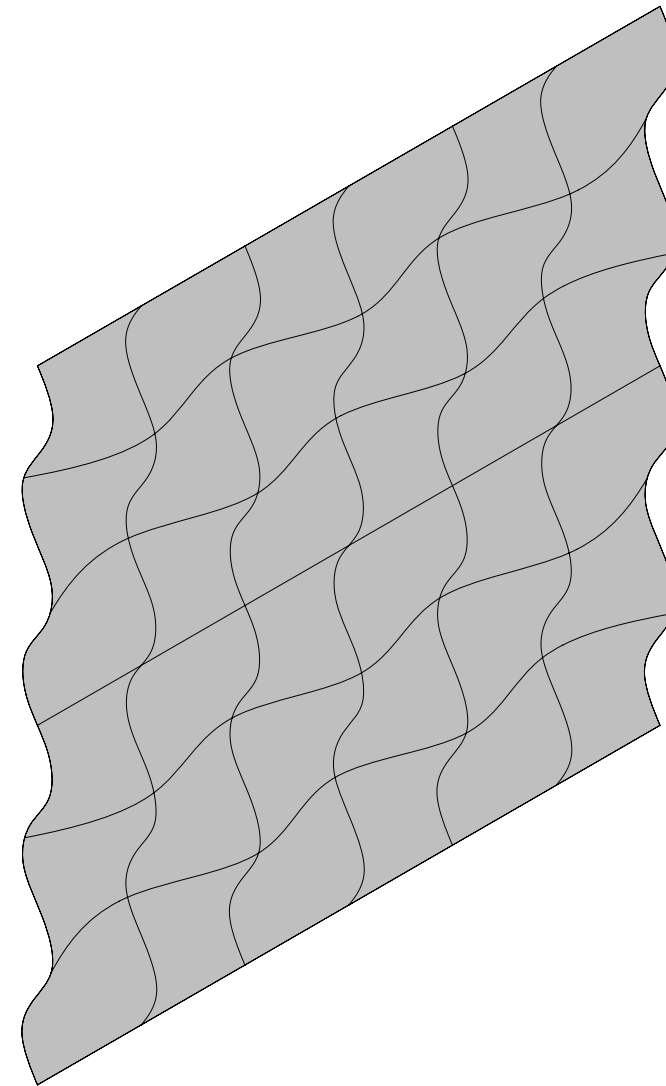

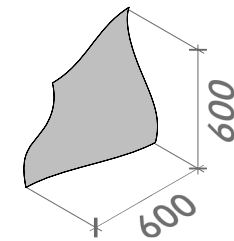

ZERO CEMENT

UHPC

ULTRA HIGH PERFORMANCE
CONCRETE

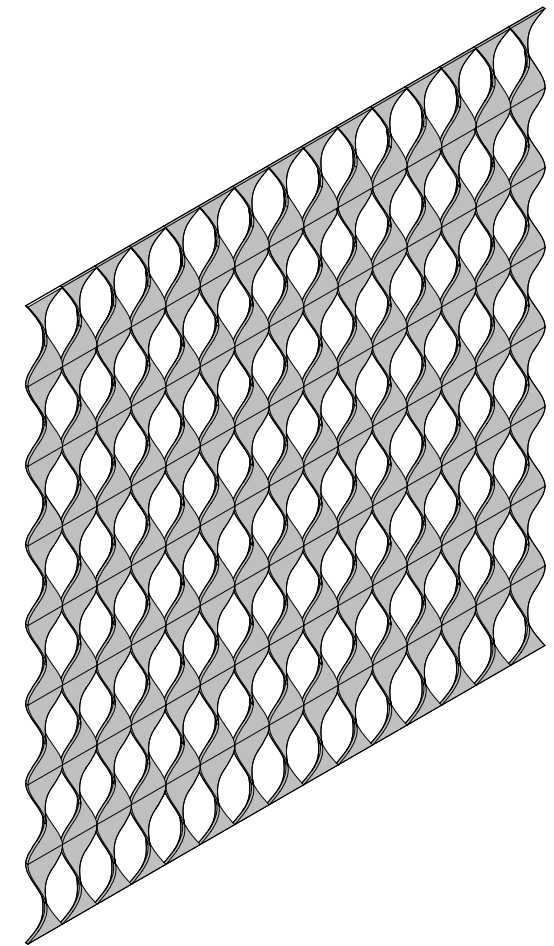

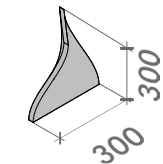

- 120 MPa+ strength
- Excellent flexural strength
- Extremely durable
- Cheaper than other UHPC

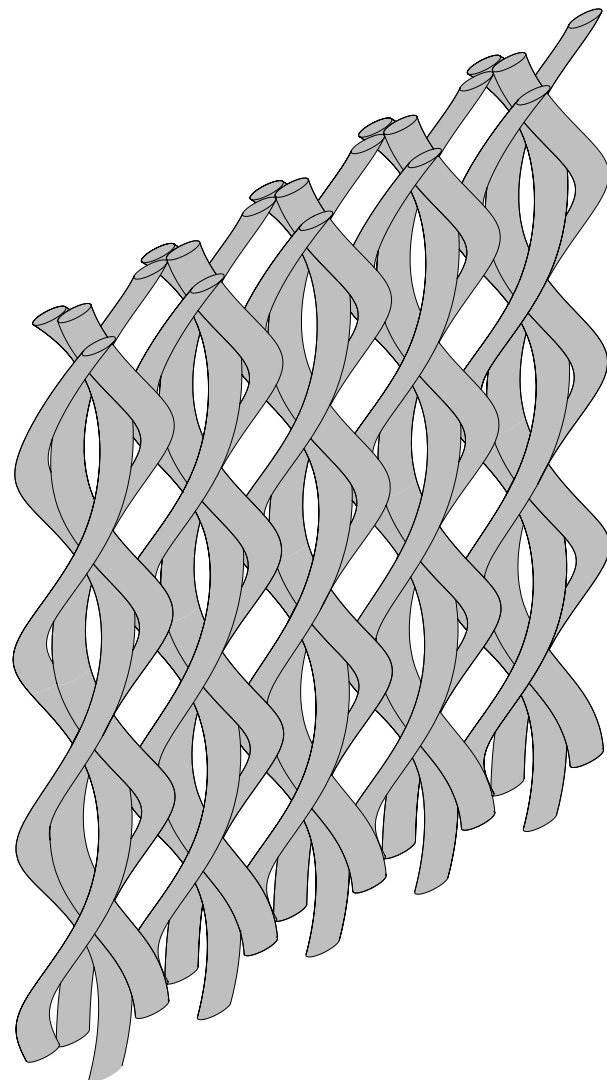

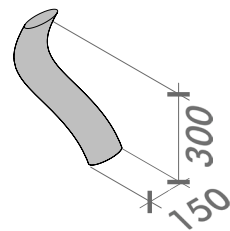

NON BREAKABLE CONCRETE

- 15 MPa+ strength
- No cracks
- Impact resistant
- Concrete's sleek, new look and a viable alternate to plastic
- Suitable for intricate doubly curved architectural features

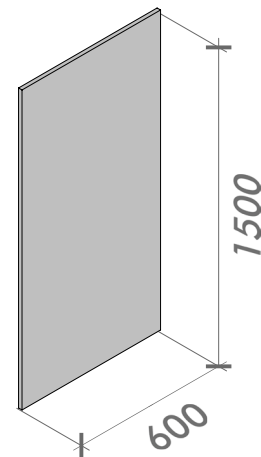

LIGHTWEIGHT CONCRETE PANELS

- Density- 500 to 1600 kg/m³
- Strength 15-40 MPa
- Tailor made for precast applications

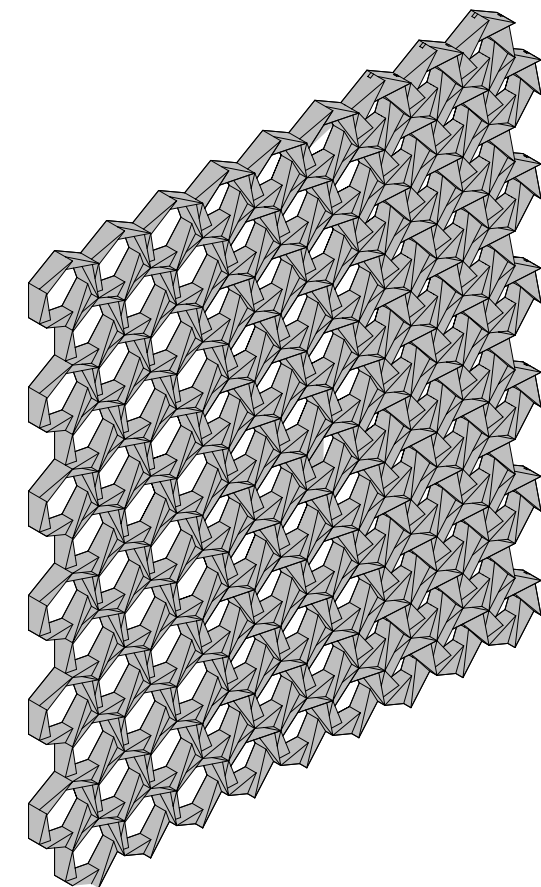

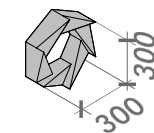

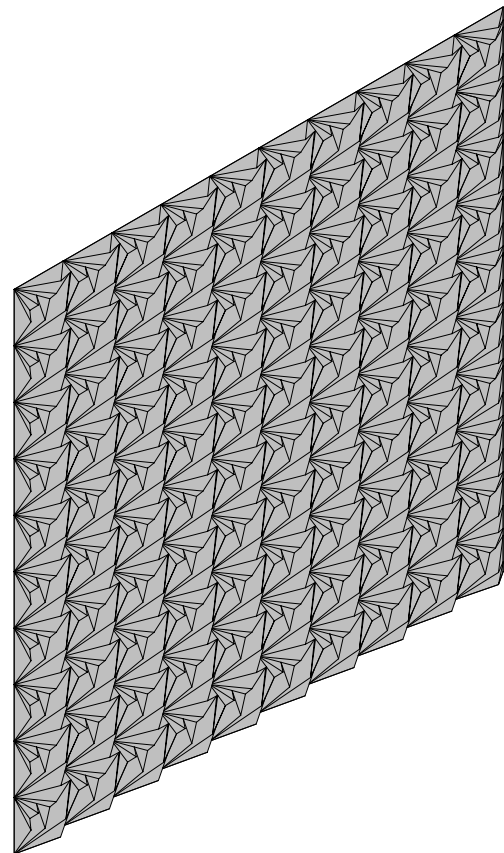

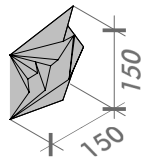

CONCRETE FOR FACADES AND INTERIORS

- Facade grade concrete- high flexure strength and MOR
- Shock absorbing concrete for floors, high impact resistant
